## SUMMARY

---

To start a career in a challenging and growth-oriented organization where I can leverage my skills to excel as a professional, aiming to achieve greater heights and recognition in my career.

## PROJECTS

---

### MESSAGE APP FOR ATTENDANCE

- Developed an android mobile application to streamline student attendance marking by selecting section, date, and attendees and send absence notifications to parent's phone numbers and even craft custom messages when needed.

### JR Dev GPT

- Developed an android mobile application integrating OpenAI's GPT model for generating contextual text responses. Employed Firebase to facilitate seamless storage and retrieval of user interactions, with a specific focus on day-wise organization of historical data.

### REQUE

- Developed an android mobile application to streamline student latecoming and outgoing requests in a college. Student submit requests with reasons, which are routed to the department head for approval. Notifications keep students informed of request status. Critical requests are escalated to the principal for approval. Once approved, student details are sent to the gatekeeper.
